This permit conveys no right to occupy any street, alley or sidewalk or any part thereof, either temporarily or permanently. Encroachments on public property, not specifically permitted under the building code, must be approved by the jurisdiction. Street or alley grades as well as depth and location of public sewers may be obtained from the Department of Public Works. The issuance of this permit does not release the applicant from the conditions of any applicable subdivision restrictions.

1. The permit holder or an authorized agent shall notify the construction code official a minimum of 24 hours in advance when work is ready for inspection and provide access.
2. Approved plans must be retained on the job and this card kept posted until final inspection has been made. Where a certificate of occupancy is required, such building shall not be occupied until final inspection has been made.
3. Work shall not proceed until the inspector has approved the various stages of construction.
4. Permit will become null and void if construction work is not started within six months of the date the permit is issued.
5. A residential building [or portion, system or equipment] may not be used or occupied without a certificate of occupancy issued by the building code official.
